Bhopal, India

PROFILE SUMMARY

Entry-level Backend Software Engineer with strong proficiency in Python and Django, experienced in building scalable backend systems, REST APIs, and automation pipelines. Hands-on experience with PostgreSQL, MongoDB, Docker, AWS, and AI-driven automation. Proven ability to design and deploy production-grade applications with secure authentication, fault-tolerant workflows, and cloud-native architecture. Passionate about building high-performance booking, payment, and management systems in fast-paced startup environments.

SKILLS & COMPETENCIES

- **Development** - Python, Django, RESTful APIs, Backend Architecture, API Integration, Automation, Selenium, Node.js (Basic)
- **Cloud DevOps** - AWS EC2, AWS RDS, AWS S3, AWS IAM, AWS Elastic Beanstalk, AWS CloudWatch, Docker, Cloud Deployment, Environment Configuration, Scalable Systems
- **Databases** - PostgreSQL, MongoDB, MySQL (Basic), SQL, Data Modeling, Query Optimization
- **AI ML Analytics** - AI/ML Concepts, Generative AI, Prompt Engineering, AI-driven automation, Data Analysis, Algorithmic Logic
- **Tools Practices** - Git, GitHub, Linux, Logging, Error Handling, Unit Testing, CI/CD Basics, Agile Methodologies
- **Messaging Search** - Redis (Basic), Elasticsearch (Basic), RabbitMQ (Basic)

EXPERIENCE

Software Engineer – Project Experience | Independent & Academic Projects | Bhopal, India | During B.Tech (2022 – Present)

HireIQ – AI-Driven Job Application Automation Platform

Python, Django, Selenium, Generative AI, Prompt Engineering, PostgreSQL, MongoDB, Docker, AWS

- Built an end-to-end job automation pipeline reducing manual effort by 70–80% through scalable multi-worker architecture.
- Designed secure RESTful APIs with authentication, logging, retries, and database-driven workflows for reliable processing.
- Implemented AI-based job description parsing and scoring to improve matching accuracy and automation efficiency.
- Containerized services using Docker and deployed on AWS, enabling scalable, restart-safe processing.

IntelliTrade – Automated Trading & Analytics System

Python, Django, Data Analysis, REST APIs, MongoDB, AWS, Docker

- Developed a scalable backend for automated trading with real-time market data ingestion and strategy execution.
- Built RESTful services for trade execution, logging, and performance monitoring with fault-tolerant workflows.
- Designed database schemas and optimized queries for high-frequency data handling and analytics.
- Deployed cloud-native services on AWS to support secure, low-latency operations.

NeuroLearn – AI-Based Personalized Learning Platform

Django, React Native, Generative AI, Prompt Engineering, PostgreSQL, MongoDB, Docker, AWS

- Architected an AI-driven learning platform delivering personalized study plans based on learner performance and goals.
- Built scalable backend services with secure authentication, API validation, and optimized database queries.
- Designed RESTful APIs enabling seamless mobile access and efficient content delivery.
- Containerized and deployed services on AWS to ensure scalability and high availability.

EDUCATION

Bachelor of Technology – Artificial Intelligence & Machine Learning

LNCT Group of Colleges, Bhopal | 2022 – 2026

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** – Amazon Web Services
- **Prompt Engineering Knowledge Universe** – Tayana Academy
- **Wipro TalentNext – .NET Full Stack Developer** – Wipro Limited
